MEMORANDUM

Date: August 21, 2006

TO: Joanne LaBaw, Task Monitor, EPA, Seattle, Washington, Mail Stop ECL-115

FROM: *RNM* Renee Nordeen, START-3 Project Leader, E & E, Seattle, Washington

SUBJECT: Site Recommendations
Larson Air Force Base Titan Missile Facility S-3

REF: Contract Number EP-S7-06-02
Technical Direction Document Number 06-01-0023

This site recommendations memorandum has been developed for the Larson Air Force Base Titan Missile Facility S-3 site, which is located near Royal City, Washington, as part of a preliminary assessment (PA). The site is a former United States Department of Defense (DoD) Titan intercontinental ballistic missile launch facility that operated from 1962 to 1966.

Currently, the site is used by B & G Farms to store out-of-service equipment and other miscellaneous items. The only remaining DoD era features are the missile silos and a building foundation.

B&G Farms is under investigation by the Washington State Department of Ecology for possible contamination relating to the storage of containers and drums at the site.

Based on the findings contained in the *Larson Air Force Base Titan Missile Facility S-3* report, and the Hazard Ranking System score of 3.66, no further action under the Comprehensive Environmental Response, Compensation and Liability Act is recommended.
